# DELIVER BREATHTAKING

A woman with glasses is shown in profile, looking upwards. She is wearing a blue and white checkered shirt. The scene is dramatically lit with blue and green light, creating a futuristic or high-tech atmosphere. The background is dark, and the lighting highlights her face and the texture of her shirt.

Deliver extraordinary

## Cloud Metro

Deliver exceptional user experiences over a converged, service-intelligent network.

HOW TO BUY

Juniper CEO Rami Rahim explains why Cloud Metro is a game changer. (4:12)

The 5G, IoT, and cloud era brings incredible revenue-generating opportunities for network operators, along with daunting new challenges. While metro traffic is growing 4x faster than any other place in the network, existing capacity can't meet the demands of ultra-low latency enterprise applications. Resources and services are getting more distributed. The lines between domains are blurring. And separate architectures for business, residential, and mobile services no longer make sense.

You can't overcome these challenges with a metro network designed for yesterday's static transport and aggregation needs. You need a network that performs more like a cloud data center than a traditional metro network.

Enter Juniper Cloud Metro, an Experience-First Networking solution built on:

- A massively scalable IP services fabric: It consists of platforms optimized to support all use cases across a single, converged Cloud Metro architecture that scales up, scales out, or both. Engineered with cloud-inspired port speeds that support the latest optics including the packet-optical convenience of 400G ZR/ZR+. The fabric provides advanced timing and synchronization for low-latency 5G services while delivering the "One Junos Experience" for operational consistency.
- Service Intelligence: We've taken the most powerful cloud principles and adapted them to metro.

vmware

### Value Realization

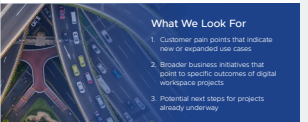

#### Every Customer Journey is Different

For most organizations, the journey to the digital workspace involves up to four IT silos:

1. Identity and access management
2. Applications
3. Desktop
4. Mobile

Each silo has probably already taken some steps.

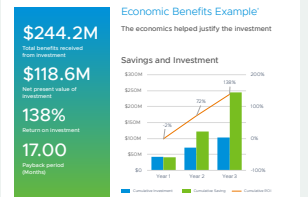

To complete the journey, these IT silos will need to align and converge.

#### Digital Workspace Pursuit Team and Value Realizer

Demonstrate the business value expressed in customer terms

- Economic benefits realized and projected
- Financial analysis as detailed as required
- Customizable selection of productivity and soft benefits

#### End-User Computing Customer's View

#### Evolving Customer Engagement

- Perform ongoing research and planning
- Initiate the buying journey from the use case
- Plan for change management
- Evaluate and provide feedback on the value realized
- Build on the successful completion of a project when setting the next
- Deploy the right tool at the right time

#### Top Three Things to Remember

1. Lead with discovery questions, not technology
2. Propose only the benefits that map directly to your sponsor's priorities
3. To win, you need the right tools and support at the right time

Share your customer success story

## SD-WAN with Session Smart Routing

Legacy networks were engineered for connectivity, and moving traffic to its destination. Today's networks are now all about the experience, going way beyond uptime to ensure that applications and services are optimized for end users.

With the acquisition of 128 Technology, Juniper has now added Session Smart™ Routing into its architecture solutions for the AI-Driven Enterprise, supporting client-to-cloud automation, insights, and self-driving action.

### Six reasons to choose Session Smart Routing

1 Breakthrough economics

- Tunnel-less architecture enables a 75% reduction in head-end infrastructure cost.
- 30-50% reduction in bandwidth costs.
- Supports white box and server infrastructure re-use.

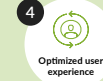

2 Scale, speed, and reach

- Free from tunnel-based limitations and automated for warp speed deployments.
- Scale rapidly to over 10,000 edges.
- Deploy new services in minutes at scale.
- Optimize applications for low bandwidth links.

3 Network as agile as the cloud

- Session-based, fine-grained routing and application-aware, boundary-free fabric extends client-to-cloud.
- Cloud applications are deployed faster, with greater resilience to network issues.

4 Optimized user experience

- Up to 60% reduction in quality-killing latency.
- Enables hitless Zoom and voice calls. Greater service availability.

5 Zero trust security

- The only zero trust fabric that simplifies access control, segmentation, and directionality with secure vector routing.
- Major reduction in the risk of network security breach.
- SASE-based policy and routing built.

6 Session visibility and application insights

- Superior richness and granularity of service and session insights.
- Reduce support costs and MTR by 30-40%.
- Continuous optimization of network performance and user experience.

Watch the SD-WANsday  
webinar and demo again.

## Stay ahead of the cybersecurity technology curve

### IBM Security's MSSP Partner Program

### Transform your MSSP business

The IBM Security MSSP Program enables you to drive revenue from managed security services based on IBM's best-of-breed and easily deployed detection, investigation and SOAR solutions.

You can also leverage IBM's unique ecosystem of expert advice, flexible business models, and distribution channels to build your suite of offerings, speedily go-to-market, and acquire new customers.

#### A partnership ensuring you differentiate against the competition:

- Offer well defined and cutting-edge services
- Innovate to stay ahead of the technology curve
- Manage enterprise products across multiple customers
- Acquire and retain customers

#### The flexible IBM Security MSSP Program enables you to:

- Easily deploy and implement effective security solutions
- Expand your service portfolio via white-labeling best-of-breed innovation
- Enable your internal security team on best practices
- Collaborate on sales engagements via training and field support
- Expand your business by providing marketing collateral and support
- Achieve recurring services revenue
- Manage enterprise products across multiple customers

The IBM Security MSSP Program even provides co-marketing funds to help you to optimize and grow your managed security service offerings and effectively and profitably meet your customers' needs.

Interested? Then discover more today.

## 3 STEP IT

### 10 WAYS AN IT DEVICE REFRESH CAN MAKE YOUR BUSINESS FEEL GREAT

Do you sweat your IT assets to get 'value for money'? Think again... because as devices age, you'll see total cost of ownership (TCO) start to rise.

**Desktop PCs.**  
12.9% rise in annual TCO between the third and sixth years of use.

**Agile worker laptops.**  
14.4% rise in annual TCO between the third and fourth years of use.

The alternative, a regular device refresh, will make your IT, finance and HR departments feel ten times better:

**3% increase in productivity** by improving working environments and their technology.

**80% of IT's TCO** is taken up by support and poor end-user productivity.

**Competitive advantage**  
Technology that works and is up-to-date drives key advantages, bringing success and growth to every area of a business.

**Costs and financial management**  
With newer, more reliable assets, your maintenance and support costs reduce, while a refresh programme helps your finance team to plan and allocate IT costs.

**Customer perception**  
When dealing with customers or in key meetings, using new technology that works reliably always leaves the right impression.

**"I think [3 Step IT's solution] sends the right message to clients that Wedlake Bell are using the most up-to-date technology in the market."**  
Lucy Phoenix, Solicitor, Wedlake Bell

**"We've been very much reliant on our staff and students reporting issues with the equipment, whereas the 3CheckIT system enables us to actively monitor and proactively see potential issues that are going to occur before they can become a major issue."**  
Nathan Smith, Senior Lecturer, University of West of England

**50% of workers** say that tech-related issues at work prevent them from doing their jobs properly.

**67% of employers** who have adopted agile working have seen significant increases in productivity.

**83% of workers** say they would be more productive if their employer gave them better technology to use.

**Employee satisfaction**  
Providing modern equipment helps day-to-day tasks work a lot more valued by their employers and gives them greater motivation.

**Mobile and agile working**  
More and more, workers expect to be able to work from home or on the move, so equipping them with portable, modern and compatible devices can help them get the job done.

**Productivity**  
Workers can be more productive when equipped with better, more durable tools, while reliable equipment reduces the maintenance and support burden on IT.

**Security**  
When you need to replace assets at the end of their lifecycle, our certified data destruction gives you reassurance that your sensitive data won't fall into the wrong hands.

**"We want to be confident that when we dispose of any assets, any client data or firm data is wiped. With 3 Step IT, we just hand them the assets and they dispose of them securely."**  
David Hyman, Head of IT, Wedlake Bell

**2 million assets** are managed globally through 3 Step IT's solutions.

**3 Step IT ensures 98% of returned devices are reused**, reducing the carbon footprint for device use by up to 47%.

**Support from an expert partner**  
3 Step IT's lifecycle management service gives you a single view of your IT estate, so you always know who has what, where, and what software is on each device.

**Sustainability**  
Assured, data secure, refurbishing lets you dispose of old assets, while improving your sustainability credentials and reducing your carbon footprint.

**Take control of your IT lifecycle.**  
To find out more about 3 Step IT's device lifecycle management and start your journey towards obtaining the ideal technology estate for your business, [click here](#).
